

The Delaware Valley Chapter Hemophilia Foundation was founded in 1950 and serves over 1700 families locally that are affected by hemophilia and von Willebrand Disease. Hemophilia and von Willebrand Disease are genetically transmitted, chronic, lifelong bleeding disorders for which there is no cure. Bleeding disorders are the most expensive chronic illness on record to manage in the world. Patients with hemophilia and von Willebrand Disease need life-sustaining medicine that can cost more than \$250,000 per year, exhausting medical insurance caps and contributing to the complex issues that affected families face.

The Delaware Valley Chapter is committed to improving the lives of local people affected by bleeding disorders. As a non-profit corporation, we offer financial assistance, patient education and social networking opportunities to our families. We provide financial support to local medical programs and research investigating cures. Our overhead is consistently under 9%, a validation of our commitment to serve patients and families while being attentive to our organizational fiscal management.

For more information or to learn about ways you can support the cause, please call the chapter office at 215-885-6500 or visit our website at [www.hemophiliasupport.org](http://www.hemophiliasupport.org).
